1. GoodSync software can be used to backup your files to your digitalbucket.net account. It also can be used to synchronize multiple Windows machines with your digitalbucket.net account.
2. White labeling allows users to brand their landing page and make it appear as it is their own web site with their Logo and Content. The sub-domain could be in the form of yourcompany.digitalbucket.net. Additional charges for more customizations.
3. My Network Collaborator Folders allows users to Share Folders with other registered digitalbucket.net users. Collaborator Folders can have "Full Control" or "View" permissions. Collaborators can access your Folders from My Network.
4. Sub accounts are defined to give customized privileges to all or parts of your digitalbucket.net main account.
5. SharePage is an HTML page for integrating information, links and files across account boundaries. It is designed to provide a centralize access point for communication between the main account and its sub accounts.
6. Web-based Distributed Authoring and Versioning (WebDAV) enables users of many desktop applications to seamlessly interface those applications with digitalbucket.net online solutions. All the sub-accounts will have access to the WebDAV server.
