**CB RICHARD ELLIS FLASH REPORT ON EMEA RENTS AND YIELDS AS AT 30<sup>th</sup> September 2010**

This report is designed to provide our clients with an immediate view on prime rents and yields across major markets and sectors in the region as at the end of the quarter.

It is our intention to provide this information as soon as possible after the end of the quarter. In some markets, the data may therefore be a preliminary estimate and clients should note that data contained within the report may be subject to revision.

Please note also that the figures contained in this report are indicative of values applying to buildings of particular quality, specification and size. The extent to which they are supported by transactional evidence varies across markets and over time. When deal flow is generally thin, as now, the quoted figures are based more on expert opinion of market conditions. Full definitions are provided on page 5.

**CB RICHARD ELLIS EU15 YIELD INDEX – ANNUAL BASIS POINT CHANGE**

**CB RICHARD ELLIS EU15 RENT INDEX – ANNUAL CHANGE**

\* Figures indicate degree of change from the highest rent or lowest yield recorded in the previous three years, and current level

## DEFINITIONS

### Prime Rent

Represents the top open-market tier of rent that could be expected for a unit of standard size commensurate with demand in each location, of highest quality and specification and in the best location in a market at the survey date.

Prime Rent should reflect the level at which relevant transactions are being completed in the market at the time but need not be exactly identical to any of them, particularly if deal flow is very limited or made up of unusual one-off deals. If there are no relevant transactions during the survey period, the quoted figure will be more hypothetical, based on expert opinion of market conditions, but the same criteria on building size and specification will still apply.

For offices, the Prime Rent should represent the typical "achievable" open market headline rent which a blue chip occupier would be expected to pay for:

- an office unit of standard size commensurate with demand in each location, typically 1,000 sq m (10,000 sq ft)
- an office unit of highest quality and specification within the local market
- an office unit within the prime location (CBD, for example) of a market

It is assumed that the occupier will also be agreeing to a package of incentives that is typical of the market at the time

### Prime Yield

Represents the Yield which an investor would receive when acquiring a grade/class A building in a prime location (CBD, for example), which is fully let at current market value rents.

Prime Yield should reflect the level at which relevant transactions are being completed in the market at the time but need not be exactly identical to any of them, particularly if deal flow is very limited or made up of unusual one-off deals. If there are no relevant transactions during the survey period a hypothetical yield should be quoted, and is not a calculation based on particular transactions, but it is an expert opinion formed in the light of market conditions, but the same criteria on building location and specification still apply.

Version 1 released 8<sup>th</sup> October 2010
